Locate OSINT Updates – January 2021

It's Neil here with January's OSINT Updates, to let you know of any changes in the world of OSINT. In this update we are going to let you know about;

- **Email Usage Finder**
- **WhatsMyName**
- **YouTube Meta Data**
- **Corporate Wiki Links**
- **TFL JamCams**

Email Usage Finder

Those nice people at Epieos have added a new Email Usage Finder search function to their online resource, to go alongside their Google Account Finder & Phone Account Finder.

At https://tools.epieos.com/holehe.php you can freely and easily search an email address to see if it is linked to a number of online sites, including Twitter, RocketReach (which is a Linkedin third-party site), OK (the Russian version of Facebook), Google and Amazon as well as a few others.

Whilst they might not provide a direct link to the account the email address is linked to, this is a quick way of finding out if enquiries are going to prove positive anyway.

The Epieos Email Usage Finder is linked to under Others Sites Of Interest heading on the People Search Sites page of our website at https://www.uk-osint.net/peoplesearch.html.

WhatsMyName

The useful people search site at https://whatsmyname.app/ have added a new search function to it, so if you are searching an online screenname / username, it will now also search it against a number of online political sites, adding it to the list of sites it already checks.

So usinghttps://whatsmyname.app/ you can search an online screenname / username against a number a categories on over 250 sites, showing the results online but letting you easily save them as a pdf or spreadsheet.

These full list of categories searched against include;

Art	Blog	Business	Coding	Dating
Finance	Gaming	Health	Hobby	Images
Misc	Music	News	Political	Porn
Search	Shopping	Social	Tech	Video

WhatsMyName is linked to under the Social Media Search Sites heading on the People Search Sites page of our website at https://www.uk-osint.net/peoplesearch.html .

LOCATE
CENTRE FOR MISSING PEOPLE INVESTIGATIONS

YouTube Meta Data
Well it's called YouTube Meta Data but it's not Meta Data as in what is often shown in relation to digital images but the site at https://mattw.io/youtube-metadata/ is still very helpful.

By adding the URL / web address of any YouTube video it will then reveal everything about a video and it's channel that is available from the YouTube API, providing useful processing of dates, country codes, language codes, geolocation, as well screengrabs which can be used in reverse image searches.

YouTube Meta Data is linked to under the YouTube Data Viewer heading on the People Search Sites page of our website at https://www.uk-osint.net/peoplesearch.html.

Corporate Wiki Links
The site at https://www.corporationwiki.com/ allows you to search for relationships & links between companies and people, identifying known addresses, phone numbers, and more.

CorporateWiki is linked under the International Company Information section of the Company Related Sites page of our website at https://www.uk-osint.net/companysites.html.

TFL JamCams
https://www.tfljamcams.net/ is a section of the Transport For London site, with a map showing the locations of all the TFL traffic cameras, which can be viewed in real-time and which each have a 3 month archive of still images, taken every 6 minutes for each camera.

TFL JamCams is linked to under the CCTV & Webcams section of the Internet Of Things Related Sites page of our website at https://www.uk-osint.net/internetofthings.html.

Many thanks & stay safe

Neil
