

Locate OSINT Updates – April 2021

It's Neil here with April's OSINT Updates, to let you know of any changes in the world of OSINT. In this month's update we are going to let you know about;

- **Parler Archive Search Site**
- **IDCrawl People Search Site**
- **Download Instagram Stories & Videos**
- **Facebook Security Breach**
- **Epieos Online Resources Have Changed**

Parler Archive Search Site

Parler is the right wing social media site, which is very similar in look and operation to Twitter, which was basically shut down after the attack on Capitol Hill in America in January this year. However it is back online and shortly coming back to the app stores.

We have added a link to a new Parler Archive Search Site at <https://parler.adatascienti.st/> to the Parler section of the General Social Media Sites page of our website at <https://www.uk-osint.net/gsocialmedia.html>

The Parler Archive Search Site at <https://parler.adatascienti.st/> is a really useful research tool for Parler posts and accounts, up to the 10th of January 2021. You can search keywords, hashtags, users and phrases without you needing to be signed into Parler.

IDCrawl People Search Site

With IDCrawl you can search for People by name at <https://www.idcrawl.com/> and by Username at <https://www.idcrawl.com/username>, returning positive links to a number of online sites.

We have added a link for **IDCrawl** to the People Search Site page of our website at <https://www.uk-osint.net/peoplesearch.html>.

Download Instagram Stories & Videos

StorySaver at <https://www.storysaver.net/> lets you easily and quickly download Instagram Stories, Highlights and Videos.

We have added a link for **StorySaver** to the Download Instagram Stories section on the Instagram page of our website at <https://www.uk-osint.net/instagram.html>.

Facebook Security Breach

The details of over 500 million Facebook users account details have recently been released following yet another security breach affecting Facebook.

HavelBeenZucked at <https://haveibeenzucked.com/> lets you search an email address, mobile number and account name to see if it was part of the 2019 Facebook data breach and may be a useful way of seeing if the details you have for someone is linked to a Facebook account.

We have added a link to **HavelBeenZucked** to the Hacked Email & Online Accounts section on the Email page of our website at <https://www.uk-osint.net/email.html#HackedEmail&OnlineAccounts>.

Epieos Online Resources Have Changed

Just a quick mention that Epieos have combined their three separate Email research tools, for Gmail Account Details, Email Usage Finder and Email To LinkedIn, in to one easy to undertake research tool at <https://tools.epieos.com/email.php>. So now you can search any email address to see if it is linked to any publicly available Gmail information, linked to a LinkedIn account or linked to a number of other online accounts.

Unfortunately the Epieos Phone Account Finder at <https://tools.epieos.com/phone.php> is still not working but hopefully will be back.

Many thanks & stay safe

Neil
